

National Boys' Education Conference K-12

Boosting boys' achievements

Mobility

Steve Doyle
Apple

The use of information and communication technology (ICT) as a means of improving boys' engagement with active learning is one of the major findings from the Federal Government's initiative *Success for boys*. Following on from this, it would seem that any active learning environment, with boys in mind, will take advantage of today's mobile learning initiatives. This interactive session will throw you into the fun of discovery learning using mobile devices that can make educational content truly engaging and supportive of learning activities.

This session is designed for everyone with an interest in learning anywhere at any time.
