

'Control Z'

"...as far as the east is from the west, so far has he removed our sins from us..."

Psalm 103:12

Reflection

Does 'Control Z' mean anything to you?

It is one of the greatest combinations on a keyboard. As I am working on my document on the computer, occasionally I can do something wrong and I do not know how to fix it. But when you press 'Control Z', it reverses your last action and takes things back to where they were.

Sounds very much like God. Unbelievably when we do things wrong we know that because of Jesus death on the cross our sins can be forgiven and just like our verse says—our sins will be totally removed from us!

When you think about it—maybe a better function would be the save key. Because once you have saved your document no matter what you do to it—you can always go back to the saved document and start over again. Maybe this function is more inline with the Christian Gospel because as we know it is Jesus who saves! Through faith in him we are able to start all over again.

Prayer

Thank you Lord that as we make a mess of our lives you can remove our sins from us so that we will not have to suffer punishment from you.

In Jesus' name. Amen.
